

HALAL POLICY

SIAT Nigeria Limited (SNL) operates its oil palm plantations and its factory with strict observance of Halal procedures to assure the confidence and peace of mind of our customers and consumers.

Management is fully committed to the production and distribution of products that are Halal-certified by relevant and recognized Islamic Authorities.

SNL has established a Halal Food Safety Team comprising qualified Muslim executives from different functions within the company to oversee the Halal Assurance System and ensure compliance with Halal requirements.

Our palm oil products are processed in accordance with stringent Islamic principles while also meeting the highest standards of hygiene, quality, and safety, consistent with international best practices and consumer expectations.

Strict segregation is enforced across all stages of processing, including raw materials, processing aids, finished products, as well as cleaning procedures. This ensures Halal requirements are consistently met and prevents cross-contamination between Halal and non-Halal products.

All relevant employees undergo periodic training on SNL Halal Guidelines to promote continued awareness and compliance.

Management is committed to providing adequate resources, training, and leadership to ensure strict adherence to this policy. The policy will be reviewed regularly to confirm its suitability, effectiveness, and alignment with regulatory, customer, and certification requirements.
